DETAILED ACTION

EXAMINER'S AMENDMENT

- 1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
- 2. The application has been amended as follows:

Add the label "PRIOR ART" to figure 8.

- This office acknowledges receipt of the following item from the Applicant:
 Information Disclosure Statement (IDS) filed on 7/2/03 and it was consider.
- 4. Claims 1-28 are presented for examination.

REASONS FOR ALLOWANCE

5. The following is an examiner's statement of reasons for allowance:

Claims 1-28 are considered allowable since the prior art made of record and considered pertinent to the applicant's disclosure does not teach or suggest the claimed limitations. The prior art does not teach the claimed invention having method and memory circuit comprising in combination with other features, a first transistor of a conductivity type having a current path coupled to the second control terminal and arranged to produce a first edge of a pulse; and a second transistor of a second conductivity type having a current path coupled to the second control terminal and arranged to produce a second edge of the pulse, the second edge having a maximum

Art Unit: 2818

rate of change of voltage with respect to time that is smaller in magnitude than a maximum rate of change of voltage with respect to time the first edge. Prior art also does not disclose a first transistor of a first conductivity type having a current path coupled to the second control terminal and arranged to produce at least one of a first edge of a first pulse and a first edge of a second pulse; a second transistor of a second conductivity type having a current path coupled to the second control terminal and arranged to produce a second edge of the first pulse and a second edge of the second pulse; and a third transistor of the second conductivity type having a current path coupled to the second control terminal and arranged to produce the second edge of the first pulse.

- 6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
- 7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takasu et al (6741489), Tanaka et al (6046926) and Osawa (5608667) discloses memory device having plurality of memory cells with biasing pulse.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to whose telephone number is (571) 272-1799. The examiner can normally be reached on Mon. - Fri. from 8:00 A.M. to 5:30 PM. The examiner's supervisor, David Nelms, can be reached at (571) 272-1787. The fax phone

number for this Group is (703) 872-9306. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-0956.

9. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov should you have questions on access to the Private Pair system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
